OBJECTIVE

To work in a supportive and growth-focused environment where I can learn, contribute meaningfully, and apply my skills in coding and development to real-world challenges, while continuing to grow both personally and professionally.

EDUCATION

Bachelor of Computer Application, Uttaranchal University   2026

SKILLS

Technical Skills	PYTHON, HTML, CSS, JAVASCRIPT, PROMPT ENGINEERING
Soft Skills	Problem Solving, Communication, Creativity, Teamwork, Time Management
Tools and Technologies	VS Code, GitHub, ChatGPT

EXPERIENCE

WEB DEVELOPER   Jan 2023 - Jan PRESENT

PERSONAL PROJECTS

- Built and deployed multiple responsive web applications using HTML, CSS, JavaScript, and Python.
- Focused on creating clean, user-friendly interfaces and smooth functionality.
- Applied prompt engineering techniques to create AI-based solutions using ChatGPT.

PROJECTS

Chess Wars. Built an interactive online chess platform with real-time gameplay and tournament hosting features. Integrated sound effects, and responsive design using JavaScript, HTML, and CSS.

Music Hut. Created a music website where users can listen to and download songs. Integrated the JioSaavn API to fetch real-time music data, keeping the content fresh and relevant. Designed the interface to be simple and intuitive, making it easy for users to enjoy their favorite music without distractions.

EXTRA-CURRICULAR ACTIVITIES

- Represented my school at the state level in chess competitions.
- Regularly explore new AI tools and technologies. Enjoy experimenting with how they work and finding creative ways to apply them in real-world scenarios.

LEADERSHIP

- **Event Volunteer and Campus Contributor.** Volunteered at university-level tech events by helping with event setup, coordination, and guiding participants. Also took part in competitions, including winning one, which helped me build confidence and teamwork skills.
